

Regulatory Compliance & Emergency Management **CONSULTING**

Professionals from York County Natural Gas Authority assist energy providers in the oil and gas industries to prepare, plan and mitigate risks associated with pipeline incidents

DID YOU KNOW?

Over 280 significant pipeline incidents occur each year in the United States. These incidents often result in serious and costly losses to property, infrastructure and sometimes even loss of life.

By combining pipeline safety regulatory compliance services with practical emergency management services we help uncover issues BEFORE they become problems.

York County Natural Gas Regulatory Compliance Consulting helps energy providers enhance their safety and emergency management planning procedures to plan for incidents, avoid future pipeline releases, and meet regulatory obligations.

Our services provide the tools to improve operational compliance, enhance employee response capabilities, mitigate risk, and prepare for an emergency situation. Most importantly our services aid in providing the assurance of a safe, reliable and economical source of energy for years to come.

Our services include:

- Emergency Plan Reviews and Development
- Incident Command System & Emergency Response Orientation Training
- Emergency Response Tabletop Exercises
- Public Sector Emergency Responder Liaison/Training Programs
- Pipeline Public Awareness Program Reviews
- Full Scale Mock Emergency Drills
- Regulatory Compliance Audits

EMERGENCY MANAGEMENT CONSULTING SERVICES:

Emergency Management Plan Development/Revision/Review

- Development of comprehensive emergency management plans for tactical and strategic response to emergency situations
- Comprehensive review/gap analysis of existing emergency management plans with recommendations for enhancement

Incident Command System & Emergency Response

- A comprehensive course intended for pipeline operations and management personnel on the Incident Command System and processes for working with local public sector responders who will respond to a pipeline emergency

Mock Exercises - Tabletop Exercises & Full Scale Mock Emergency Drills

- Development and execution of customized, company-specific mock emergency tabletop exercises and full scale drills to assess adequacy of plans, procedures and readiness of company response personnel

PIPELINE SAFETY REGULATORY COMPLIANCE CONSULTING SERVICES:

Pipeline Safety Regulatory Compliance Review, Procedure Development

- Comprehensive compliance assessments and gap analysis of existing pipeline operations and maintenance manuals, procedures, and related documents
- Development of pipeline safety and compliance plans and procedures for new pipeline assets

Pipeline Public Awareness Program Plan Assessments & Stakeholder Audience Outreach Initiatives

- Review and assessment of existing regulatory required pipeline public awareness compliance programs and related processes
- Development of company specific pipeline public awareness program outreach components for designated stakeholder audiences, such as communication vehicles, liaison meeting coordination and emergency responder tabletop exercises

York County Natural Gas Authority (YCNGA) is a public natural gas utility and a member of Patriots Energy Group (PEG). YCNGA maintains both high pressure transmission and distribution lines in Lancaster, Chester, York and Cherokee Counties in South Carolina. For over 55 years YCNGA has provided residential, commercial and industrial gas service earning accolades for safety including most recently the Silver SOAR Award from the American Public Gas Association (APGA).
